Electricity—

In your home—it will not only light your rooms but it will cook, clean, sew, wash and iron for you—all at the simple turn of a switch or push of a button.

In your office—it will operate your dictaphone, your adding machine and run your vaccum cleaner—at any time without effort on your part.

In your factory—it will furnish the power for almost every known type of machine.

Consult our specialists as to the particular service which electricity offers you.

INTRODUCTION

OGDEN CITY, with its immediate suburbs, shows a population of 37,910, a comfortable and progressive increase of 1470 over the compilation of 1919. The information contained in the 1920 issue of the OGDEN DIRECTORY indicates the continued development of the second city of Utah.

As soon as the country was released from war activities, OGDEN went forward with a bound; increased financial resources, commercial development, and added capacity of factories having carried the city far beyond any maximum heretofore attained.

During the last few years, OGDEN has been gradually developing into the chief food manufacturing center between the Missouri River and the Pacific Coast.

At the beginning of 1919, work was well under way on the huge storage plant of the GLOBE GRAIN AND MILLING COMPANY, which is now the most conspicuous object on the western horizon of OGDEN, having a storage capacity of 750,000 bushels of grain. As a part of this plant, a stock food mill has also been completed and the foundation laid for a 2,000 barrel flour mill.

During the year just passed, the SPERRY FLOUR COMPANY has also erected in OGDEN an elevator with storage capacity for 750,000 bushels of grain; has the building for a 2,500 barrel flour mill under way, to be followed by feed mill, cereal food mill, stock food mill, office building, etc. during 1920. The securing of the SPERRY plant has meant more to OGDEN than simply the acquisition of another immense industry, for it has resulted in making OGDEN the milling center of the intermountain states.

The Holley Milling Company and Albers Brothers Milling Company each entered OGDEN by the purchase of existing properties, which properties they have greatly enlarged and improved.

Agriculturally OGDEN is the center of both an inner circle of highly productive irrigated farming lands, which supply produce for its factories, and also the center of a much more extensive outer circle which is and alawys will be essentially a livestock producing section. Recent developments have established OGDEN as the logical center for handling this livestock. During 1919, the Union Stock Yards of OGDEN handlel 731,764 head of live stock. Stock men, and shippers from all parts of the West say that these yards are of the most modern type and afford every convenience.

In other lines of manufacturing OGDEN has shown greatly increased capacity: Canneries have built new and up-to-date factories.

OGDEN'S great wholesale houses have not only kept the pace, but have continually spurred factory, furnace and farm to greater industrial activity.

Civic development, although much retarded during 1918 on account of war conditions, is now leading the march in improvements since bonds have been voted for schools, paving, sewers and parks provides the largest fund for civic improvements, which has ever been at the disposal of the city.

Respectfully submitted,

R. L. POLK & CO.

The tires which bear the famous name of

BRUNSWICK

are made in our own factories. The workmen are guided by the ideals that have made possible a world-wide reputation for highest merit.

Brunswick Tires

are made under the direction of experts who constantly promote the standards of perfection set up by the founder of the House of Brunswick 75 years ago.

Brunswick TIRES

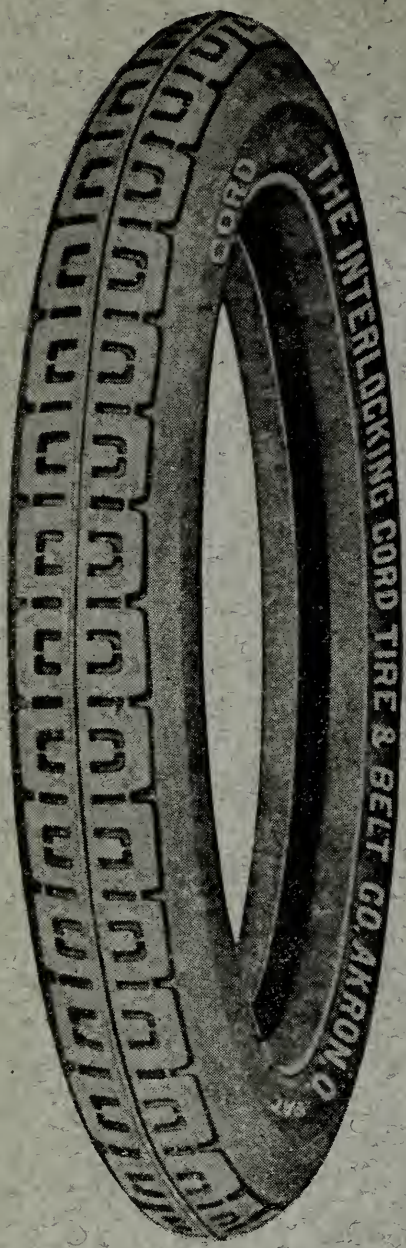
(over)

A NEW IDEA, A BETTER TIRE, A TIRE UNIVERSAL



Interlocking Cord Tires

As the name indicates, represent an entirely new idea in tire construction. In the standard form of blanket, hard twisted cords of considerable size, are held side-by-side and the soft sheet of gum forced around the cords by hydraulic pressure.

The troubles that have developed in the Cord Tire business are due to the fact, that, owing to the hard surface of the cord, the grip upon the cords was very uncertain.

By a system of braiding and weaving, we manufacture cord strands that have a strength never before approached and an adhesivable surface that leaves nothing to be desired. When the gum is applied to our cord, the rubber gets such a grip that only by tearing the blanket to pieces can the cords be withdrawn.

Owing to the ease with which this woven cord blanket may be manipulated, we have an unusual advantage, in the cost of production for the carcass, over all other manufacturers. Consequently, our price for a cord tire is about the same as for the better grades of fabric tires of the same size, and the way in which the cord strands are manufactured of braided and twisted cord, gives a strength and tenacity never before approached.

KING COAL
SOLD BY ALL OGDEN DEALERS
UNITED STATES FUEL CO. SALT LAKE CITY

This Directory is Imperfect

For the reason that during the time it was being prepared and before its delivery into your hands, many of those whose names appear have died.

Are you sure your name will be in the next directory?

IF

we could read the deaths that will occur before another directory is issued some people would be looking for LIFE INSURANCE.

Our New Policies Provide:
Double Benefit for Accidental Death

MONTHLY LIFE INCOME to insured if TOTALLY DISABLED by sickness or accident; no more premiums to pay in, then at death full benefit to beneficiary.

Life Insurance is also one of the best savings schemes yet invented for men and women.

Loans on demand the day you want the money DEATH CLAIMS paid immediately, and many other advantages.

Portage Tires

Are All EXTRA PLY

■ ■ ■ ■

THEY ARE

AIR BAG CURED

Thus, all chance of fabric pinching is eliminated. This process is more expensive, but it insures longer life to the tire.

Portage Tires

Are extra high grade in fabric, rubber and workmanship. Made in cords and fabrics.

There are three types of

BRUNSWICK FABRIC TIRES

"BBC Skid-Not"—"Ribbed" —and "Plain" Treads.

All Are Extra Ply

There are no better tires than Brunswick. For three generations The Brunswick-Balke-Collender Company has fashioned quality merchandise. No one has ever done it better—no one can do it better. For back of this experience is the dominance of capital, equipment, organization, and, best of all, the habit of making the best.

Today—The House of Brunswick is crowding mileage into Tires. They are doing it with tremendous success.

The tires which bear the famous name of

BRUNSWICK

are made in our own factories. The workmen are guided by the ideals that have made possible a world-wide reputation for highest merit.

Brunswick Tires

are made under the direction of experts who constantly promote the standards of perfection set up by the founder of the House of Brunswick 75 years ago.

BRUNSWICK TIRES

Rowell and Thompson

Ogden Dealer

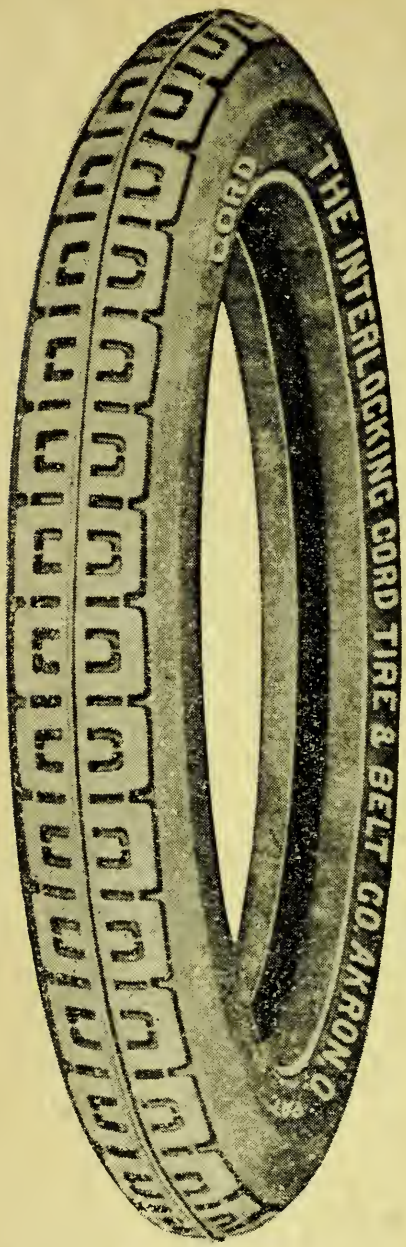
(over)

A NEW IDEA, A BETTER TIRE, A TIRE UNIVERSAL



Interlocking Cord Tires

As the name indicates, represent an entirely new idea in tire construction. In the standard form of blanket, hard twisted cords of considerable size, are held side-by-side and the soft sheet of gum forced around the cords by hydraulic pressure.

The troubles that have developed in the Cord Tire business are due to the fact, that, owing to the hard surface of the cord, the grip upon the cords was very uncertain.

By a system of braiding and weaving, we manufacture cord strands that have a strength never before approached and an adhesivable surface that leaves nothing to be desired. When the gum is applied to our cord, the rubber gets such a grip that only by tearing the blanket to pieces can the cords be withdrawn.

Owing to the ease with which this woven cord blanket may be manipulated, we have an unusual advantage, in the cost of production for the carcass, over all other manufacturers. Consequently, our price for a cord tire is about the same as for the better grades of fabric tires of the same size, and the way in which the cord strands are manufactured of braided and twisted cord, gives a strength and tenacity never before approached.

CORD TIRES

Are Increasingly

POPULAR

WHY?

Because they give more miles for the dollar.

The wise Autoist of today is buying

CORDS

Let us show you why Cords are worth the extra cost

Rowell and Thompson

262 24th Street. Phone 1378

Between Interurban Station and Post Office

Also GAS, OIL AND ACCESSORIES

(OVER)

Portage Tires

Are All EXTRA PLY

■ ■ ■ ■

THEY ARE

AIR BAG CURED

Thus, all chance of fabric pinching is eliminated. This process is more expensive, but it insures longer life to the tire.

Portage Tires

Are extra high grade in fabric, rubber and workmanship. Made in cords and fabrics.

GAS, OIL AND ACCESSORIES

There are three types of

BRUNSWICK FABRIC TIRES

"BBC Skid-Not"—"Ribbed" —and "Plain" Treads.

All Are Extra Ply

There are no better tires than Brunswick. For three generations The Brunswick-Balke-Collender Company has fashioned quality merchandise. No one has ever done it better—no one can do it better. For back of this experience is the dominance of capital, equipment, organization, and, best of all, the habit of making the best.

Today—The House of Brunswick is crowding mileage into Tires. They are doing it with tremendous success.
